

Our Orlando destination is open for business we are currently hosting thousands of additional visitors and also began welcoming new flight arrivals today.

The hotels, restaurants and airports are operational and busy with guests. The popular International Drive district is operational with numerous open restaurants and attractions to welcome attendees, as are our Retail, Dining, and Entertainment Districts including I Drive 360, Point Orlando, Disney Springs and Universal CityWalk.

The Orange County Convention Center is open and fully operational.

As the most-visited destination in the United States, the Orlando region had a high level of advance preparedness for hurricanes and a post-storm dedication to quickly resuming operations. We have an extraordinary infrastructure of public and private entities that work together to resume the region's operations quickly and safely. Because of this, we historically experience minimal disruptions to business from intense weather events.

Additional on-going destination updates can be found on [VisitOrlando.com/hurricane](https://www.visit-orlando.com/hurricane).

Our team is here to answer any questions you may have.

We look forward to seeing you and your attendees soon.
